With 2,966 constituents, the index covers approximately 85% of the global investable equity opportunity set. Index performance is discussed for illustrative purposes only as a benchmark for each strategy’s performance and does not predict or depict performance of that strategy. While index comparisons may be useful to provide a benchmark for a strategy’s performance, it must be noted that investments are not limited to the investments comprising the indices. Each of the strategy benchmark indices are unmanaged and cannot be purchased directly by investors.
